

# Legalism Assignment

Please work in groups of 3-4 to complete this assignment. Each group needs to elect a leader. Please work to complete the assignment as a group, but the leader will have the final say in all group decisions.

Assignment: Create laws and punishments/rewards for a fictional country. Please use a laptop to complete this assignment. Each assignment should have all group member's names on the document. Please organize your information into a chart that looks like the example on the bottom of this assignment.

Steps:

- 1) Please create a name for your country and explain why you chose this as a name for your country.
  - a. Ex: Kindnessland – we chose this name because the root of all of the laws in our country will be to promote kindness for all people in this country so we can live harmoniously.
- 2) Next, create a list of the first TEN laws in this country. Each law must be very specific.
  - a. Ex: Each citizen of Kindnessland will be openminded when it comes to a person's religious views.
- 3) Next, create a punishment for anyone breaking each law that you create.
  - a. Ex: Anyone not respecting someone's religious views, or being observed disrespecting someone's religious views, will be forced to spend TWO months attending church services in the disrespected faith. Failure to attend these services will result in THREE months of hard labor in a labor camp.
- 4) Next, create a reward for each law that you create.
  - a. Ex: Anyone observed defending someone's right to religious views, or intervening when someone's religious views are infringed upon, will receive a commendation from the President. This commendation will be accompanied by a \$100 credit to the citizen's bank account. Commendations will not be issued for clear pandering attempts by the citizen.
